

Case Study 14: SafeGuard Insurance - Policy & Claims Analytics

Industry: Insurance

Modules: Reporting, Exploration, Dashboard, Story Making

Real-Time Business Scenario: SafeGuard Insurance Company offers health, life, motor, and property insurance products. The company's Claims Processing team has flagged that claim settlement is taking longer than the IRDAI mandated 30-day period, rejection rates are higher than industry average, and fraudulent claims are rising. The Chief Actuary wants IBM Cognos Analytics to provide visibility into claims patterns, agent productivity, policy renewals, and fraud indicators to streamline operations.

Question 1: Reporting

Total Claims, Settled Claims, Pending Claims, Average Days to Settle, and Rejection Rate %. Apply Conditional Styling: Avg Days > 30 in Red (IRDAI breach), 20-30 in Amber, < 20 in Green. Add prompts for Agent Branch Create a Claims Settlement Report grouped by Policy Type showing and Policy Type. Header must include SafeGuard branding; Footer must include 'Regulatory Document'.

Question 3: Reporting

[Reporting] Using Report Visualize Prompt, allow Regional Managers to select chart type (Bar or Column) to view Monthly Claims Volume vs Settlement Rate. Add prompts for Policy Type and Date Range. Summarize months where settlement rate dropped below 70% using Conditional Styling in Amber. Add a text annotation of the top 3 settlement bottlenecks in the report.

The screenshot shows a report visualization tool interface. On the left, there is a sidebar titled 'Insertable objects' with a search bar and a list of fields from a data source named 'Project14-dm'. The main area displays a table with the following data:
